T24-BSu Miniature 2.4GHz USB Wireless Telemetry Base Station

Key Features:

- Provides Wireless Data Acquisition from T24 Acquisition Modules
- Works with all T24 Telemetry Instruments
- Simple USB Device
- Very Compact
- IP50 Rated Enclosure
- Powered From USB Port
- Simple 'Plug & Play' USB
- Configure & Calibrate the T24 Devices
- Data Collection for PC/PLC
- Miniature desk or wall mounting
- IP50 enclosure dimensions 76 x 35 x 20 mm

The T24-BSu Base Station allows configuration of any of the T24 wireless telemetry modules via a PC or laptop using the T24 Telemetry Toolkit Software which is included. It draws power from the USB bus and therefore no further components are required to configure and control remote devices from a PC. It can be used to collect data from as many T24 acquisition modules as you have in your system to provide wireless datalogging functionality.

The T24-BSu is supported by not only the T24-toolkit but also with a .dll (Dynamic Link Library) allowing customers using VB (Visual Basic) to develop their own custom software for their applications. The miniature non weatherproof IP50 enclosure is suited to desktop and wall-mounting.

If you require a tougher base station with improved environmental protection, the IP67 rated [T24-BSi industrial base station](#) offers the ideal alternative. See our [full range of wireless telemetry instrumentation](#).
