RoHS, REACH & WEEE Compliance Statement

RoHS 3 (2015/863) & (2011/65/EU)

Applied Measurements product range includes various sensors and electronic instrumentation including pressure transducers/transmitters, load/force transducers, torque transducers, LVDT displacement transducers, indicators, conditioners and digitisers.

All our products comply with Directive 2015/863 which has amended Annex II to Directive 2011/65/EU of the European Parliament and the Council of 8 June 2011 on the restriction of use of certain hazardous substances (RoHS) in electrical and electronic equipment.

Product-specific compliance certificates are available on request.

REACH (1907/2006)

As a downstream user, Applied Measurements Ltd does not engage in the manufacture or importation of substances, and therefore, we are not obligated to register substances under REACH. We rely on the compliance of our suppliers with the relevant registration requirements.

Applied Measurements Ltd ensures that any substances procured and used in our processes or products comply with the requirements of REACH. We assess the safety data sheets (SDS) provided by our suppliers and communicate relevant information to downstream users, as required by REACH Article 37.

Applied Measurements Ltd monitors and ensures compliance with any authorization or restriction requirements under REACH for substances used in our processes or products. We actively work to substitute substances subject to authorization or restriction with safer alternatives when available.

Applied Measurements Ltd confirms that our products do not contain substances classified by the EU REACH 1907/2006 as Substances of Very High Concern (SVHC). We are committed to staying informed about updates to the REACH regulation and any changes in the list of SVHC. We will adapt our processes and practices accordingly to maintain continuous compliance.

WEEE (2012/19/EU)

Any equipment of our supply that has reached the end of its service life can be returned to us for disposal if you are unable to send it to an approved recycling plant, in accordance with the WEEE Directive. The transport costs for any returned goods must be borne by the owner of the goods.
